New Delhi,

SUMMARY

I'm a dedicated Full-Stack Developer with a passion for building user-friendly web applications. Proficient in React and Node.js, I enjoy taking projects from concept to completion in collaborative, agile environments. My goal is to create effective solutions that enhance user experiences while staying updated with industry trends.

EMPLOYMENT HISTORY

Full Stack Developer, Codenuers

Jan 2024 -- Present, New Delhi

My Role as a Full-Stack Developer:

1. Building User Interfaces

- I create user-friendly interfaces using HTML, CSS, and JavaScript frameworks like React or Vue.js. I focus on making sure everything looks great and works seamlessly on both mobile and desktop devices.

2. Server-Side Development

- I handle the back-end by developing server-side logic with technologies like Node.js and Express. This includes designing RESTful APIs to connect the front end with the back end and ensuring everything runs smoothly.

3. Database Management

- I work with databases, both relational (like MySQL) and non-relational (like MongoDB). This involves designing databases, writing efficient queries, and making sure our data is organized and easy to access.

4. Version Control

- I use Git for version control, which helps me manage code changes and collaborate with other developers. Code reviews and working in agile teams are a big part of how we stay aligned and improve our codebase.

5. Deployment and DevOps

- I manage our deployment processes, using CI/CD tools to automate the workflow. I also deploy applications to cloud platforms like AWS or Heroku, ensuring our projects are accessible to users.

6. Testing and Debugging

- I write tests to ensure our code is robust and bug-free. When issues arise, I dig into both front-end and back-end code to debug and resolve them efficiently.

7. Enhancing User Experience

- I conduct user testing to gather feedback and improve our applications. I also prioritize accessibility to ensure everyone can use our products, following best practices.

8. Documentation

- I keep detailed documentation for our code, APIs, and user guides. This helps team members and future developers understand how our projects work.

9. Continuous Learning

- I'm always learning new technologies and keeping up with industry trends. Whether it's attending workshops or online courses, I strive to enhance my skills and bring fresh ideas to the table.

10. Client Interaction

- I communicate with clients to gather requirements and provide updates on project progress. Collaborating with designers and product managers is key to ensuring we meet our goals.

EDUCATION

maulana mazharul haque university

Graduate Diploma in Business Administration

Currently pursuing a BCA, I'm diving into programming, software development, and web technologies. My studies are hands-on, focusing on real-world applications that help me sharpen my problem-solving skills. I'm passionate about full-stack development and enjoy working on projects that explore new technologies. My participation in coding competitions has also taught me to think on my feet and adapt quickly.

Education Level	Board	Year of completion	Percentages
10th Grade	BSEB	2022	61.4%
12th Grade	BSEB	2024	58.6%

COURSES

NSIC

C, C++ and Oops
